Students Participate in New Hampshire Construction Career Days in New Boston

New Hampshire's Carpenter Local Union #118 helps students hammer out their future plans.

More than 900 students participated in the 6th annual New Hampshire Construction Career Days (NHCCD) at the 4-H Youth Center in New Boston, N.H., Sept. 17 and 18. Students from 45 New Hampshire schools registered for the event.

NHCCD educates local New Hampshire high school students about construction and highway career opportunities through hands on exhibits and informational seminars. During this two-day event,

see CAREERS page 20

Milton CAT and White Mountains Community College partnered for the event, which gave students the opportunity to operate heavy machinery.

Allied Recycling Finds Success With Help From Liebherr and Lorusso

Edward Jamieson has been in the scrap industry for decades. When the opportunity arose in 2003 to take over the site of a former demolition and recycling center in Walpole, Mass., Jamieson jumped at the opportunity.

The company started off like so many other companies, as a very small, family-owned entity, doing everything they could to generate scrap metals. In 2010, Michael Sciaba joined the Allied Recycling team and has been key in handling the company's daily business operations. In the extremely competitive industry, Allied has grown more than 250 percent over the last 4 years by making customer service the absolute priority.

see ALLIED page 4

The A934C HD Liebherr material handler makes easy use of its grapple to stockpile and load out scrap metal.

N.H. Students Learn About Careers in Construction Industry

(L-R): Larry Cutting, facilities maintenance instructor of HBI Building Careers, educates two Raymond High School seniors about the career opportunities available in home building construction and carpentry.

Metro Walls, based in Manchester, N.H., hosts an exhibit to teach students how to hang dry wall.

Portsmouth Naval Shipyard provides an opportunity to operate a marine robot that was built by other students, and informed students about apprenticeships they have available to them once they graduate.

CAREERS from page 1

various booths and exhibits provided students an opportunity to work with heavy machinery, and try welding, plumbing, carpentry, pouring concrete, land surveying, electrical

Multi-Weld Services Incorporated of Contoocook, N.H., provides a hands-on welding experience for the students.

On Point Concrete Foundations shows students the fundamentals of pouring concrete for building foundations.

Elaine Hamel, founder of Girls At Work, empowers women in the industry.

wiring, land clearing, waste water management and other construction related jobs. Local dealers, contractors, colleges and organizations were on hand to help create awareness and educate students about career opportunities available within the industry.

(This story also can be found on *Construction Equipment Guide's* Web site at www.constructionequipmentguide.com.) CEG

Ander Equipment allows students to operate its Komatsu excavator.

Renaissance Acres in Weare, N.H., hosts an exhibit to educate students about the land clearing industry.
